

Name: Christopher Herbin

Primary email address: christopher.herbin@rothamsted.ac.uk

Organisation: Rothamsted Research

Role: Scientific Technician

Image title: Mixing it up!

Image Caption: Nature helping the dispersion of basalt. The image shows a worm burrowing through the basalt that was applied to the field as part of the enhanced rock weathering demonstration at Rothamsted Research (Harpenden, UK). Worms and other natural burrowing wildlife are a key element in dispersing and integrating the basalt rock dust with the soil to allow for its reaction with, and capture of atmospheric CO₂.

Location: GGR-ERW demonstrator at the Great Harpenden II field experiment at Rothamsted Research (West Common, Harpenden, AL5 2JQ, UK)

Date Taken: 25/10/2023
