

Name: Javier Hernandez

Primary email address: javier.hernandez@rothamsted.ac.uk

Organisation and role: Scientific technician at Rothamsted Research

Image caption: Carbon dioxide removal as it happens. The image captures the rain over the flowering oilseed rape in the field of the GGR-ERW demonstrator at Rothamsted Research (Harpenden, UK). The rain is a key element for the ERW technology because it is the vehicle that brings the atmospheric CO₂ into the ground to allow the reaction with the silicate-rich basalt added to the soil.

Location: GGR-ERW demonstrator located at the Great Harpenden II experimental field at Rothamsted Research (AL5 2JQ, Harpenden, UK)

Date taken: 19/04/2024
